Objective

Dynamic and detail-oriented engineering graduate with a robust foundation in software development and web technologies, complemented by hands-on internships in Flutter and web design. Proficient in HTML, CSS, and JavaScript, demonstrating a strong ability to create responsive and user-friendly applications. Passionate about leveraging creative problem-solving skills and adaptability to contribute effectively to innovative projects. Eager to apply technical knowledge and collaborative spirit to drive success in a challenging role within the tech industry..

Education

Qualification	Board / University	Name of collage	Year of Passing	Percentage / CGPA
B. Engineering in (Computer Science)	VTU University Belagavi . Karnataka	Moodlakatte Institute of Technology, Kundapura	JUNE - 2025	8.82
12 th	State Board	Nutana Independent Science College, Davangere	JULY – 2021	96.44
10 th	State Board	B L R junior High School, Sirigere	APRIL - 2019	92.48

Projects

- Restaurant Management System : Technologies Used: SQLite3, Python . Developed a system for managing restaurant
- Emotion Detection : Technologies Used: Streamlit, SQLite3 . Created an application to detect emotions
- Wheat Disease Detection using Convolutional Neural Network(CNN) : Technologies used : Python, TensorFlow(with Keras API), Flask ,CNN. Developed a Project to detect a septoria and Stripe Rust using a CNN .

Experience (Internship)

- **Flutter framework Intern | Sumana Embedded Technologies | Remote** **Sep,2024 – Dec ,2024**
Successfully executed on the internship project involving defining, designing, implementing and testing software module of image optimization on PC using flutter framework (dart language) ahead of two-month stipulated time.
- **Web Development and Design Intern | OASIS INFOBYTE |Remote** **Aug,2024 – Sep , 2024**
Successfully completed two levels of tasks, gaining hands-on experience in front-end and back-end development. Designed and developed various web applications, including a temperature conversion website, landing page, calculator, to-do app, login authentication system, and a tribute page. Enhanced skills in HTML, CSS, JavaScript, and authentication mechanisms while improving UI/UX design. Demonstrated problem-solving abilities and attention to detail in building responsive and functional web solutions.

Skills

- **Programming Languages** C, Java, Python, HTML, CSS, JavaScript, MySQL, Dart (basic about Flutter),Django (Framework).
- **Tools & Technologies** Visual Studio Code, GitHub, Eclipse, WampServer, Google colab.
- **Soft Skills** Creativity, Teamwork, Leadership, Communication, Public Speaking, Time Management, Adaptability.

Certificates

- Web Development and Designing in OASIS INFOBYTE.
- Data Analytics with Python in Cognitive Class.
- Google Data Analytics in Coursera.
- Google Finance Data Analyst Professional Certificate in Coursera.
- TCS iON Career Edge - Young Professional (a course that covers Communication Skills |Presentation Skills | Soft Skills).
- java Script for Beginners :The Complete course for Beginners in Udemy.
- Hacker Rank Certificate for skill Problem solving (Basic).
